

Object Oriented Programming Lab

Lab 07

Instructions

Work on this lab individually. You can use your books, notes, handouts etc but you are not allowed to borrow anything from your peer student.

Write down the lab number, task number, your name and roll number at the start of each task code using comments.

For Example

```

/*****
Lab:    xx
Task:   yy
Developer:
        Roll #: XXXYYYZ000
        Name:  XYZ
*****/

```

What you have to do

Program the following tasks in C++, compile and execute them.

Task

Design a class **Distance** with the following private data members:

- int feet
- float inches

Create:

- A **constructor** to initialize the values.
- A **function display()** to print the distance in the format: Feet: X, Inches: Y
- Overload the **+** **operator** to add two Distance objects.
- Overload the **-** **operator** to subtract one Distance object from another.

In the main() function:

- Create two objects of Distance.
- Add and subtract them using the overloaded operators.
- Display the results.

😊😊😊 **BEST OF LUCK** 😊😊😊
