

Object Oriented Programming Lab

Lab 09

Instructions

Work on this lab individually. You can use your books, notes, handouts etc but you are not allowed to borrow anything from your peer student.

Write down the lab number, task number, your name and roll number at the start of each task code using comments.

For Example

```

/*****
Lab:    xx
Task:   yy
Developer:
        Roll #:  XXXYYYZ000
        Name:   XYZ
*****/

```

What you have to do

Program the following tasks in C++, compile and execute them.

Task

Design a class named **PersonData** with the following member variables:

- lastName
- firstName
- address
- city
- state
- zip
- phone

Write the appropriate accessor and mutator functions for these member variables.

Next, design a class named **CustomerData**, which is derived from the **PersonData** class. The **CustomerData** class should have the following member variables:

- customerNumber
- mailingList

The customerNumber variable will be used to hold a unique integer for each customer. The mailingList variable should be a bool. It will be set to true if the customer wishes to be on a mailing list, or false if the customer does not wish to be on a mail ing list. Write appropriate accessor and muator functions for these member variables.

In the main() function:

- Create object of **CustomerData**.
- Display the complete information.

😊😊😊 **BEST OF LUCK** 😊😊😊
